MICROMED®

MICROMED MICROPEN
12
12 MONTH GUARANTEE*

Optimum synthetic substance

- high voltage strength up to 7500 Volt
- more than 250 sterilization cycles
- highly resistant to detergents

Electrode handle MicroPen® from Micromed® • Highest quality with 12 months guarantee • Electrode handle MicroPen®

The **MicroPen®** is an innovative reusable electrode handle that can live up to highest demands. Due to optimum technical production and the use of top quality materials we have created a handle with maximum longevity as well as optimum handling comforts.

Handle and cable separable

By separating handle and cable, the components can be replaced separately in case of defects. This lowers costs and is environmentally friendly.

Highly convenient

Sensibly located pushbuttons and the easily felt pressure point (on/off click) as well as the rough outside surface make the MicroPen especially user-friendly, even under tough conditions.

Cleaning and Disinfection

The MicroPen can be sterilized more than 250 times at 134° C.

Highest compatibility

The MicroPen® is compatible with a wide range of different manufacturers' surgical units, as for instance: Aesculap, Berchtold, Integra ME, Erbe, Martin and Micromed.

* every MicroPen® comes with a 12 month guarantee on purchase.
