MICROMED MICROPEN

12

12 MONTH GUARANTEE*

Optimum synthetic substance

- high voltage strength up to 7500 Volt
- great number of sterilization cycles
- highly resistant to detergents

Electrode handle MicroPen® • Highest quality with 12 month guarantee • Electrode handle MicroPen® from Micromed®

The **MicroPen®** is an innovative electrode handle that can live up to highest demands. Due to optimum technical production and the use of top quality materials we have created a handle with maximum longevity as well as optimum handling comforts.

Handle and cable separable

By separating handle and cable the components can be replaced separately in case of defects. This lowers costs and is environmentally friendly.

Highly convenient

Sensibly located pushbuttons and the easily felt pressure point (on/off click) as well as the rough outside surface make the MicroPen especially user-friendly.

Cleaning and Disinfection

The MicroPen can be sterilized more than 250 times.

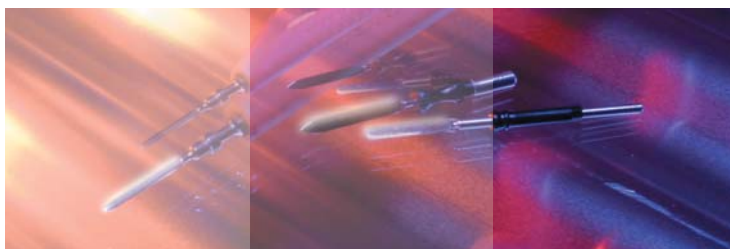

Highest compatibility

The MicroPen is compatible to a wide range of different manufacturers' surgical units, as for instance: Aesculap, Berchtold, Integra, Erbe, Martin and Micromed.

*every MicroPen® comes with a 1 year guarantee on purchase.
